Office Action Summary

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 165 is rejected under 35 U.S.C. 102(a) as being anticipated by Tohji article.

Tohji teaches on pg. 1975 purification of SWNTs in hot oxidant. The presence of torroids is deemed inherent, as a variety of carbon species are synthesized when nanotubes are made.

Claims 1-17, 163-164 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tohji article taken with Bandow et al. and/or Bonard et al.

Tohji teaches on pg. 1975 purification of SWNTs in hot oxidant. This does not teach a surfactant, however Bandow/Bonard teach purifying nanotubes with a surfactant such as SDS. Using both purification techniques is an obvious expedient to gain the effect of both, to make very pure nanotubes. See In re Kerkhoven 205 USPQ 1069 and Ex Parte Novak 16 USPQ 2d 2043

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
